

Jing Li

jliellen@yorku.ca | [LinkedIn](#) | [Google Scholar](#) | [Website](#)

RESEARCH INTERESTS

- GenAI, LLMs, Deep Learning, Data Mining, Mobility, Big Data Analytics

EDUCATION

PhD student in Computer Science, York University

Toronto, Canada

Supervisor: Dr. Manos Papagelis

Jan 2024 – Expected 2027

- Specialize in Data Mining/Graph Mining/Generative Models/AI

Master in Computer Science, York University

Toronto, Canada

Supervisor: Dr. Manos Papagelis

Sept 2021 – Dec 2023

- Thesis: Trajectory Prediction Learning Using Deep Generative Models
- Courses: Machine Learning, Neural Networks and Deep Learning; Average Grade: A+

Bachelor in Computer Science, York University

Toronto, Canada

Graduated with distinction

May 2018 – Apr 2021

- Cumulative GPA of 8.6/9 across all courses

HONORS & AWARDS

- Connected Minds PhD Scholarship (2024-27)
- Vector Scholarship in AI (2021-22)
- Lassonde Graduate Entrance Scholarship (2021)
- Lassonde Undergraduate Research Award (2020, 2021)
- York Continuing Student Scholarship Recipient (2020)
- Merei Family Scholarship Recipient (2019)

PUBLICATIONS

- **(Minor Revision)** A. Nadiri, **J. Li**, A. Faraji, G. Abuoda, and M. Papagelis, “TrajLearn: Trajectory Prediction Learning using Deep Generative Models,” pp 1-10
- **(ACM SIGSPATIAL 2023)** A. Faraji*, **J. Li***, G. Alix, M. Alsaeed, N. Yanin, A. Nadiri, and M. Papagelis, Point2Hex: Higherorder Mobility Flow Data and Resources. In Proceedings of the 31st ACM SIGSPATIAL International Conference on Advances in Geographic Information Systems, pp 1-4, 2023
- **(Big Data Research 2022)** T. Pechlivanoglou, **J. Li**, J. Sun, F. Heidari, M. Papagelis, Epidemic Spreading in Trajectory Networks. Vol. 27, 100275, pp 1-15, 2022
- **(ACM SIGSPATIAL/SpatialEpi 2022)** T. Pechlivanoglou, G. Alix, N. Yanin, **J. Li**, F. Heidari, and M. Papagelis, Microscopic modeling of spatiotemporal epidemic dynamics. In Proceedings of the 3rd ACM SIGSPATIAL International Workshop on Spatial Computing for Epidemiology, pp 11–21, 2022
- **(IEEE MDM 2022)** G. Alix, N. Yanin, T. Pechlivanoglou, **J. Li**, F. Heidari and M. Papagelis, A Mobility-based Recommendation System for Mitigating the Risk of Infection during Epidemics. In Proceedings of the 23rd IEEE International Conference on Mobile Data Management, pp 292-295, 2022

RESEARCH AFFILIATIONS

- HQP/student member of Data Mining Lab @YorkU
- HQP/student member of Centre for AI & Society (CAIS)
- HQP/student member of One Health Modelling Network for Emerging Infections (OMNI-REUNIS)
- HQP/student member of NSERC CREATE in Dependable Internet of Things Applications (DITA)

*These two authors contributed equally to this work.

EXPERIENCE

Course Director, EECS 4414 Information Networks

Sep 2024 – Dec 2024

Lassonde School of Engineering

Toronto, Canada

- Developed and delivered comprehensive course content, including lectures, assignments, and exams, ensuring alignment with the program's learning objectives and industry standards.
- Conducted regular office hours and provided one-on-one support to students, addressing academic concerns and fostering a supportive learning environment.
- Monitored student progress and performance, identifying at-risk students and providing additional resources and support to help them succeed.

Research Assistant

Apr 2020 – Aug 2021

Data Mining Lab

Toronto, Canada

- Contributed to research on Epidemic Dynamics in Trajectory Networks, focusing on the analysis and modeling of disease spread within dynamic network structures.
- Developed innovative mobility-based spatiotemporal models for epidemic spread; designed individual-based intervention strategies and a data-driven recommendation model to aid in personal trip decision-making.
- Conducted extensive case studies mirroring the COVID-19 outbreak, utilizing realistic synthetic mobility data in urban settings; ensured the availability of the source code for public access.
- Delivered a live oral presentation at the Lassonde Undergraduate Summer Student Research Conference.
- Co-authored multiple scholarly articles related to the project, contributing significantly to the academic community.

Teaching Assistant

Sept 2021 – Present

Lassonde School of Engineering

Toronto, Canada

- Highly dedicated to facilitating students' learning experiences. **Courses TA-ed** and tasks:
- EECS 3311 Software Design (2021): Marked lab assignments and evaluated projects.
- EECS 3124 Computer Network Protocols and Applications (2022): Responsible for marking assignments and invigilating exams.
- MATH 1090 Logic for Computer Science (2022): Tasked with assignments marking and exam invigilation.
- EECS 2001 Intro. to the Theory of Computation (2023): Conducted assignments marking and exams invigilation.
- EECS 4414 Information Networks (2022, 2024) & EECS 6414 Data analytics and visualization (2024): Facilitated assignments marking, evaluated course projects, and conducted tutorials on Python and NetworkX.

Referee Services

Sept 2021 – Present

Journal/External Reviewer

Toronto, Canada

- ACM International Conference on Knowledge Discovery & Data Mining (ACM KDD), 2021-2024
- International Conference on Research and Development in Information Retrieval (ACM SIGIR), 2022-2024
- ACM International Conference on Web Search and Data Mining (ACM WSDM), 2022-2023
- SIAM International Conference on Data Mining (SIAM SDM), 2023
- ACM International Web Conference (ACM TheWebConf), 2023
- IEEE Transactions on Knowledge and Data Engineering (TKDE), 2022
- International Conference on Computer Science and Software Engineering (CASCON), 2021-2022
- ACM International Conference on Information and Knowledge Management (ACM CIKM), 2022
- Computational Intelligence (COIN), 2021

TECHNICAL SKILLS

Programming: Python, Java, C, JavaScript

ML&DL: PyTorch, PyTorch Lightning, Pandas, NumPy, Scikit-Learn, Matplotlib

Relevant skills: Git, LaTeX, Docker

SOFTWARE RELEASES

- **(POINT2HEX)** A tool for converting trajectory datasets to higher-order trajectory datasets where each trajectory is represented as a sequence of hexagons on a hex-tessellated map. We provide the code and a repository of popular datasets. URL: <https://github.com/alifa98/point2hex>
